

IN THE SPECIFICATION

Please cancel the entire specification of the subject U.S. patent application, including the List of Reference Symbols, as filed, as constituted by the verified translation of PCT/EP2005/050374 in favor of the concurrently filed Substitute Specification. That substitute specification is the result of the entry into the verified translation of a suitable cross-reference to related applications, of a discussion of prior art documents, as was done in the PCT application, and of suitable section headings; the deletion of the List of Reference Symbols and of references to the claims, the correction of minor errors in phrasing, grammar and punctuation, and a general revision of the verified translation, in an effort to place the Substitute Specification more in a form in accordance with U.S. practice. These various changes and corrections do not constitute any new matter. A marked-up copy of the verified translation, which shows the changes made thereto, to arrive at the Substitute Specification, is included for the Examiner's review.
